"My passion for what I do, and the journey that inevitably ensues, creates some wild adventures, both career wise and in life! I am so fortunate that I really do love my vocation. I thrive on the process, each scenario in every way different, while continuously being inspired and humbled by the overachievers I get to collaborate with, and the collective sense of pride we share when it all comes together!

As a photographer, I do feel that capturing an image that has an emotive narrative is my primary objective. Be it with talent, or just a scene, the viewer needs to be moved in a direction that translates either the story I am trying to tell, or the scene that is unfolding."
